ABSENTEE BIDDING Buyers are asked to register through liveAuctions.tv and bid online, but can also bid by phone through one of our sale day phone staff. You first must set up a bidder number through our clerk or one of our sale day phone staff. You can rest assured that our staff will help direct you and answer questions with integrity in order for you to get the cattle you want. A full guarantee and terms of sale apply to all bidders.

INTERNET BIDDING We are pleased to bring you real-time internet bidding and a live broadcast of this sale through liveAuctions.tv. To watch or bid online, visit www.liveAuctions.tv to register and apply for bidding in advance of the sale. If you have any questions, contact LiveAuctions.tv 937-763-8115 (Lindsey Hall) or for Tech Support 682-816-4900

TERMS & CONDITIONS Terms of the sale are cash, credit card at 3.5% convenience fee, or good check. The auctioneer will settle any disputes as to bids. All cattle are to be paid for in full by the purchaser immediately following the sale and will not be released until settlement has been made. Cattle will not be transferred until paid in full.

CREDIT CARD PAYMENT We will accept all major credit cards this year with a maximum of 3.5% convenience fee applied to your purchase.

STATE TO STATE TRANSPORT Our veterinarian will issue health papers for the release of the cattle to your state provided they meet your state's requirements. All cattle should meet most state requirements. It is the buyer's responsibility to understand their state requirements that may have special guidelines for receiving cattle. Buyers purchase cattle for transport at their own risk.

GUARANTEE All guarantees, both written or expressed, are the responsibility of the individual consignor. All cattle are guaranteed to be as stated by the consignor. Every effort will be made to ensure safe handling of the sale cattle all the way through pick-up or delivery. EVERY PURCHASE IS FULLY GUARANTEED TO MEET THE APPROVAL OF THE BUYER UPON PICK-UP OR DELIVERY.

THANK YOU TO OUR SPONSORS

The KY Black Hereford Association is a nonprofit organization. The mission and purpose of the association is to bring attention to the breed and its benefits to cattlemen. It further endeavors to provide marketing opportunities and support for its members that are raising quality Black Hereford cattle. We depend on sponsors and advertisers for their support and contributions. On behalf of the association and its members we want to express our sincere thanks for your support and advertisements that helped make this catalog possible.

October 5, 2024

WELCOME

Greetings Everyone,

This will be the 3rd annual KY Finest Sale hosted by the Kentucky Black Hereford Association and Triple T Farms. When we started this sale, the purpose of the event was to create a market for many small breeders in the association that were raising quality cattle but needed a place to become recognized and a place to showcase their efforts in producing great cattle. I can't tell you how excited I am about the quality of cattle that our consignors have been bringing to this event to market. This is one of the many reasons that this sale has quickly become a premier sales event in the Black Hereford breed. This year is no exception. We have a very good variety of cattle to choose from and I can assure you the quality is top shelf. This year we are also excited to have some commercial Black Baldy females in the sale that are sired by a Black Hereford Bull, and they are ready to breed this fall. They will take your breath away!

As all of you know the market is strong right now and from all indications it will remain to be on top for a long time before we see a decline. Female replacement heifers are still at an all time low and until that number rebounds the market has no choice but to remain strong. You just couldn't ask for a more exciting time to be in the cattle business, nor will you find a better time to increase both the numbers and quality of your herd. Black Herefords and black hided cattle always top the market. This along with their docility, fertility, and fast-growing offspring are just a few of the reasons that the Black Hereford breed continues to be one of the fastest growing breeds in the world. On behalf of the Kentucky Black Hereford Association and Triple T Farms we want to invite you to be with us for a fun and exciting day. I am available at any time if you have any questions or need any assistance. Service and quality cattle are our business. I hope to see you all here. If you can't be here in person, you can bid and buy with confidence live via the internet. We will help you make all the necessary arrangements in holding and helping get your purchases delivered.

Sincerely,

Tim Tarter

Triple T Farms & KBHA President

HERD HEALTH All animals have been vaccinated and dewormed within 90 days of the sale. All animals sell with health certificates from each consignor's personal veterinarian.

BULL FERTILITY AND TEST All the bulls in the sale are virgin bulls, unless otherwise stated, and have completed a complete Breeding Soundness Exam (BSE). All bulls are guaranteed by the consignor to be fertile and capable of breeding.

ANNOUNCEMENTS A supplement sheet will be available sale day with any up-to-date information and corrections. This sheet and any announcements made from the auction block will take precedence over statements in this catalog. We reserve the right to remove any sale lot not meeting the sale specifications prior to the sale.

EXTENDED HOUSING To help with the coordination of purchases and trucking, extended housing is available through Triple T Farms at the rate of \$3 per lot per day to cover the expense of feed, hay, and silage. Contact Tim with any questions.

ACCOMMODATIONS

For those of you needing accommodation for the sale, we have a block of rooms locked in at 2 different hotels. Group rates end on 9/20/2024

BOLT EPD DEFINITIONS

(CED) Calving Ease EPDs are calculated using birth weight and calving ease score information. Calving ease EPDs represent the ease with which progeny of an animal are born to first calf heifers. The EPD is expressed as a percent probability, with a higher value representing calves with a higher probability of being born unassisted.

(BW) Birth weight is an indicator of calving ease. Higher birth weight EPDs usually indicates more calving difficulty.

(WW) The weaning weight EPD reflects progeny growth differences up to 205-days.

(YW) The yearling weight EPD reflects progeny growth differences through to 365-days.

(MILK) The milk EPD indicates the ability of a sire's daughters to provide their calves with an environment that encourages growth from birth to weaning, through mothering ability and milk production. This EPD is expressed in the expected difference in pounds of calf at weaning.

(TM) Total Maternal Also known as Milk + Growth, this EPD combines the milk EPD plus ½ the weaning weight EPD. It is expressed in pounds of calf weaned at 205-days and combines the genetics for preweaning growth and the influence of the maternal environment on the weaning weight of the daughter's progeny.

(CEM) Calving Ease Maternal EPD represents the ease with which a sire's daughters will calve as first calf heifers, when compared to daughters of other sires. The EPD is expressed as a percent probability, with a higher value representing daughters with a higher probability of unassisted calving.

(Stay) Stayability The Stay EPD reflects differences in the probability that a sire's daughters will remain in production to produce 3 consecutive calves when retained as breeding heifers.

(DOC)...temperament and behavior of the sire's progeny

(CW) The Cow Weight EPD reflects differences in the mature weight of a sire's daughters. This is important as it is related to maintenance energy requirements.

(YG): Yield grade differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean-to fat ratio.

(CREA) RibEye Area, The REA EPD reflects differences in rib-eye area carcass measures in feeder progeny.

Marbling (MARB) The MARB EPD reflects differences in carcass measures of marbling in feeder progeny, using USDA marbling scores.

(CFAT): Differences for fat thickness, in inches, for a carcass over the 12th rib, smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

(API) All-Purpose Index Expressed in net dollars returned per cow exposed, evaluates sires being used on the entire cowherd bred to both first-calf heifers and mature cows with a portion of the daughters retained for breeding and the steers and remaining heifers fed and sold on a carcass grade and yield basis.

(TI) Terminal Index expressed in net dollar returned per cow exposed, evaluates the merit of sires when bred to mature cows and all progeny are fed and sold on carcass grade and yield basis.

KENTUCKY AND TENNESSEE COST SHARE PROGRAMS

Many Bulls in the Sale are eligible for cost share money on bull purchases for qualified buyers through their prospective State.

Kentucky

All the bulls in the sale except for Lot 3 & 8 qualify for cost share money in KY.

Most of the heifers in the sale will qualify for cost share money in KY. Check KY Dept. of Agriculture CAIP cost share program for details and requirements at: http://www.kyagr.com/marketing/documents/AM_Beef_HB-Sale-Requirements.pdf

Tennessee

The TN Department of Agriculture is currently updating their EPDs for TAFP bull cost share money. Based on the information we had at the time of printing most of the bulls in the sale will qualify for cost share money. We will have an updated supplement sheet on sale day with accurate evaluations of the bulls that will qualify for TN Bull money.

RYAN BETZELBERGER | Marketing Specialist, TAFP
 Department of Agriculture Tennessee Agricultural Enhancement Program
 Ellington Agricultural Center
 P.O. Box 40627, Nashville, TN 37204 (Mail)

DISCLAIMER: Qualifying information is based on our research. Any ruling by either the KY or TN Department of Agriculture supersedes our research. We recommend you research the data yourself before purchasing an animal that you intend to apply for cost share money. The management of this sale shall not be held liable for any mistakes in our research. We have made these finding in good faith to the best of our ability.

Please note:

The EPD's were recorded in this catalog on August 20,2024 The American Black Hereford Association updates the Bolt EPD's weekly, at the date of transfer to new owner they may not 100 % match what is posted in this catalog.

CONSIGNED BY: SWEETING FAMILY CATTLE AI Sired by P44057384 (NJW 13A 6589 MANIFEST 87G ET). Brockle-faced. This guy is really gentle and super friendly. 2301 comes at you with that added frame size and body length that lends itself to bigger scaled calves at weaning. As an added feature, 2301's genomic makeup processes the heterosis that the cattle industry demands.

CONSIGED BY: WAYNE FLYNN This is a beautifully marked bull. He had a great weaning ration of 110. His stay ability Epd ranks in the top 1% of the breed and his API Epd is in the top 15% I can't think of 2 more profitable EPDs than these, balance and longevity. Everything you could ask for in a herd sire.

CONSIGNED BY: TRIPLE T FARMS I am really having a hard time letting this one go. She is an ET calf by our 2016 Junior National Champion female and the maternal king Black Dynasty. We selected this mating because of how the sire and female complement each other, and this female shows it. This is one special female that will have an enormous impact in any herd and could take you to the next level of performance. AI on 11/28 to Mango/HB019640 then pasture exposed to 11J Black Cuda HB021410 and will calve before sale. Calf will have a 50% chance of being homozygous black.

CONSIGNED BY: TRIPLE T FARMS This female has been on of our go to cows for performance. She is the right kind and has the eye appeal that all cattlemen want in a pasture female. We have several females in production in our herd from her. It's hard to let her go but with many heifers coming of breeding age we must part with some. She has remarkable Epsd which further cements her worthy of any herd. Don't let this powerhouse slip away from you. She sells safe in calf for a late fall calf to Black Cuda HB021410.

CONSIGNED BY: TRIPLE T FARMS This F1 female has done an outstanding job for us. She was chosen as a heifer to help us build our herd due to her strong genetics and pedigree. She has certainly done the job for us. It is time for her to do the same for another breeder. She has many years still in her to produce those fast-growing calves. We can't say enough about the job she has done for us. Just look at these EPDs. Top 3% for weaning, Top 1% for yearling TM, CW and Ribeye, Top 2% for CF top 4% for YG and top 10% for CEM and API. These numbers are hard for any female in the breed to stand up against She sells safe in calf to one of the leading performance bulls in the breed C Triple Your Miles HB014436. We have mated her before to him and the calves are outstanding. She will calf before the sale. We expect this to be a special calf. Mostly black with a touch of white on her face.

CONSIGNED BY: **CRANE FARM & BALDWIN FARMS**

Selling five lots of five straws each. El Mago continues to impress us with his calves and their performance. He has been everything we had hoped he would be. One of his first sons topped the TBHA sale this spring at \$7500. His daughters are developing into some very beautiful females also. Add some El Mago genetics to your next calf crop and you will be as impressed with the results as we have been. Owned with Baldwin Black Herefords.

Selling 5 lots of 5 Straws

How Does Fescue 7 Help Your Herd?

- MAINTAINS APPETITE & BODY CONDITION
- HAVE HEALTHIER CALVES
- REDUCES FESCUE TOXICOSIS
- LOWERS BODY TEMPERATURE

CONSIGED BY: YOUNG FARMS YF Elizabeth Pendleton 36 is a percentage heifer from one of our past successful show cows, known for consistently producing quality calves. Her sire is a son of the famous BCKST BLACK DYNASTY Z420 ET from Triple T Farms. A stout February heifer that has already been in the show ring, she's built right from the ground up and moves exceptionally well. Her dam was an impressive show heifer as 2021 Reserve F1 Female at the Black Hereford Junior Nationals and Reserve Black Hereford Female at the Hoosier Beef Congress. Halter broke and ready to keep competing; this heifer combines a proven pedigree with the potential for future success in the ring or the pasture. Sells open.

CONSIGED BY: YOUNG FARMS YF Rev Violet 33 is out of one of our favorite dams, purchased from Triple T Farms a few years ago. Her sire is a son of the famous BCKST BLACK DYNASTY Z420 ET from Triple T Farms. This heifer has performance written all over her. We really hate to part with this heifer, as she has been a standout in our herd. She combines a solid pedigree with exceptional performance potential, making her a valuable addition to any breeding program. She is a big, soggy heifer that exhibits the desirable traits of the Black Hereford breed. Bred to RHBH088, one of the top herd sires at Rode Hause Black Herefords. She is due for a late spring calf.

CONSIGNED BY: BW CATTLE BW TIDAL WAVE 07J is a powerhouse, considering she entered this world at just 52 pounds. A well made baldy who is black to the ground, this 75% female has the look to stand in a crowd. BEHM Cuda sired some productive females, and this one is no exception, with powerful bone and muscle and impressive EPDs across the board. 07J sells bred to our Homozygous Black, Homozygous Polled senior herd sire, JCR Blackout 706, for a spring calf. Vet checked safe in calf.

CONSIGNED BY: TRIPLE T FARMS This female is just coming into her prime. She is sire by the famous Red Hereford bull Hometown. She has done a remarkable job for us with 4 offsprings that we have sold for an average of 3200 each and she has a great calving interval of 377 days. She is just a performance female in everyway 7 of her Epsd rank in the top 15% of the breed. Everybody needs a female of this caliber in their herd. She sells AI safe in calf to the legendary Y702 bull for a late February calf. Calf will be black.

CONSIGNED BY: BW CATTLE BW ABIGALE 2202 is a goggle eyed beauty that is as laid back as they come. Stemming from the same cow family that produced the immortal Angus sire, SAV Bismarck, Abigale has a world of genetic potential. This is another BW consignment with elite level EPDs, with a 135 YW and 35 Milk, just to highlight a couple. An older full sister is in our ET program. 2202 is the first female to sell carrying the service of our new junior herd sire, SELB/BW Innovator L042, our Homozygous Black, Homozygous Polled son of JRK 462/6C6 Game Changer 809, and we expect great things from this young stud. Get in on the ground floor of something good with this one. Sells vet checked safe for a spring calf.

CONSIGNED BY:WAYNE FLYNN This beautiful female has a lot of style and will add value to any herd. She could be bred late this fall or let her mature more and make her a spring calving cow by breeding her next spring. Either way she is a keeper.

COMMERCIAL HEIFERS

This is an outstanding group of yearling heifers that will add tremendous value to any herd. Their dams stem from prominent and powerful angus cows and all are sired by a Triple T Farms Black Hereford bull. Quality heifers like these don't come around every day. They will be money makers in any herd. You simply can't beat a Black Baldie cow for fertility, docility and growth. These are some everyone will be wanting to take home. They all stand ready to breed this fall to the bull of your choice. Don't let this opportunity slip away from you. Born late August through early October 2023
