ABSENTEE BIDDING Buyers are asked to register through CCI.Live and bid online, but can also bid by phone through one of our sale day phone staff. **You first must set up a bidder number through our clerk or one of our sale day phone staff.** You can rest assured that our staff will help direct you and answer questions with integrity in order for you to get the cattle you want. A full guarantee and terms of sale apply to all bidders.

INTERNET BIDDING We are pleased to bring you real-time internet bidding and a live broadcast of this sale through CCI.Live To watch or bid online, visit [www. CCI.Live](http://www.CCI.Live) to register and apply for bidding in advance of the sale. If you have any questions, contact CCI.Live 812-530-0748 (Brooklyn Graham) or for Tech Support 405-400-9505

TERMS & CONDITIONS Terms of the sale are cash, credit card at 3.5% convenience fee, or good check. The auctioneer will settle any disputes as to bids. All cattle are to be paid for in full by the purchaser immediately following the sale and will not be released until settlement has been made. Cattle will not be transferred until paid in full.

CREDIT CARD PAYMENT We will accept all major credit cards this year with a maximum of 3.5% convenience fee applied to your purchase.

STATE TO STATE TRANSPORT Our veterinarian will issue health papers for the release of the cattle to your state provided they meet your state's requirements. All cattle should meet most state requirements. It is the buyer's responsibility to understand their state requirements that may have special guidelines for receiving cattle. Buyers purchase cattle for transport at their own risk.

GUARANTEE All guarantees, both written or expressed, are the responsibility of the individual consignor. All cattle are guaranteed to be as stated by the consignor. Every effort will be made to ensure safe handling of the sale cattle all the way through pick-up or delivery. **EVERY PURCHASE IS FULLY GUARANTEED TO MEET THE APPROVAL OF THE BUYER UPON PICK-UP OR DELIVERY.**

VETERINARIAN

Dr. Courtney Brockman 859-588-4176

CATALOG PRODUCTION

Teresa Tarter

THANK YOU

We would like to extend a special thanks to all of our consignors and the many volunteers that work behind the scenes to make this event possible.

October 24, 2026

HERD HEALTH All animals have been vaccinated and dewormed within 90 days of the sale. All animals sell with health certificates from each consignor's personal veterinarian.

BULL FERTILITY AND TEST All the bulls in the sale are virgin bulls, unless otherwise stated, and have completed a complete Breeding Soundness Exam (BSE). All bulls are guaranteed by the consignor to be fertile and capable of breeding.

ANNOUNCEMENTS A supplement sheet will be available sale day with any up-to-date information and corrections. This sheet and any announcements made from the auction block will take precedence over statements in this catalog. We reserve the right to remove any sale lot not meeting the sale specifications prior to the sale.

EXTENDED HOUSING To help with the coordination of purchases and trucking, extended housing is available through Triple T Farms at the rate of \$3 per lot per day to cover the expense of feed, hay, and silage. Contact Tim with any questions.

Accommodations:

There are several hotels in Somerset, Ky. Due to a local event we would recommend you book early.

WELCOME

I would like to take this opportunity to invite you and welcome you to the 5th annual KY Finest Sale. This event has become one of the premier sales in the Black Hereford Breed. I am personally more excited about this year's event than I ever have been before. First, the cattle business remains as strong as it has ever been even with the concerns of increased imported beef. The fact remains that there are not enough cattle not only in the USA but anywhere in the world! The demand is over the top for our cattle and the supply remains low. As long as this is a factor, I firmly believe that our market price will stay strong, and we may see it go even higher in the spring of 2027. The other thing that has made me so excited about this sale is the increased numbers of consignors from around the country. These consignors, as you will see, have offered some of their best and the quality is well represented in this sale. Here at Triple T Farms as always, we have allocated some quality lots also. This will be our largest sale too date as we are proud to offer over 100 lots of high-quality cattle. This sale also offers a good mix of all cattle from open heifers, show prospects, bred heifers, cow calf pairs, 3 in ones, semen lots and a few select outstanding bulls. Whether you are a registered breeder or a commercial breeder that is looking to improve your genetics, replace some animals or expand your herd, I am confident that we will have something to meet your needs.

We will have a great day of fellowship and fun as this sale is highly attended. If you can't make it in person CCI will be broadcasting the sale live and you can purchase online. On behalf of Teresa and myself, the KBHA board of directors, and all our consignors, we sincerely hope you will join us. This is one event you don't want to miss.

We look forward to seeing you here on sale day.

Sincerely,

Tim Tarter

BOLT EPD DEFINITIONS

(CED) Calving Ease EPDs are calculated using birth weight and calving ease score information. Calving ease EPDs represent the ease with which progeny of an animal are born to first calf heifers. The EPD is expressed as a percent probability, with a higher value representing calves with a higher probability of being born unassisted.

(BW) Birth weight is an indicator of calving ease. Higher birth weight EPDs usually indicates more calving difficulty.

(WW) The weaning weight EPD reflects progeny growth differences up to 205-days.

(YW) The yearling weight EPD reflects progeny growth differences through to 365-days.

(MILK) The milk EPD indicates the ability of a sire's daughters to provide their calves with an environment that encourages growth from birth to weaning, through mothering ability and milk production. This EPD is expressed in the expected difference in pounds of calf at weaning.

(TM) Total Maternal Also known as Milk + Growth, this EPD combines the milk EPD plus $\frac{1}{2}$ the weaning weight EPD. It is expressed in pounds of calf weaned at 205-days and combines the genetics for preweaning growth and the influence of the maternal environment on the weaning weight of the daughter's progeny.

(CEM) Calving Ease Maternal EPD represents the ease with which a sire's daughters will calve as first calf heifers, when compared to daughters of other sires. The EPD is expressed as a percent probability, with a higher value representing daughters with a higher probability of unassisted calving.

(Stay) Stayability The Stay EPD reflects differences in the probability that a sire's daughters will remain in production to produce 3 consecutive calves when retained as breeding heifers.

(DOC)...temperament and behavior of the sire's progeny

(CW) The Cow Weight EPD reflects differences in the mature weight of a sire's daughters. This is important as it is related to maintenance energy requirements.

(YG): Yield grade differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean-to fat ratio.

(CREA) RibEye Area, The REA EPD reflects differences in rib-eye area carcass measures in feeder progeny.

Marbling (MARB) The MARB EPD reflects differences in carcass measures of marbling in feeder progeny, using USDA marbling scores.

(CFAT): Differences for fat thickness, in inches, for a carcass over the 12th rib, smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

(API) All-Purpose Index Expressed in net dollars returned per cow exposed, evaluates sires being used on the entire cowherd bred to both first-calf heifers and mature cows with a portion of the daughters retained for breeding and the steers and remaining heifers fed and sold on a carcass grade and yield basis.

(TI) Terminal Index expressed in net dollar returned per cow exposed, evaluates the merit of sires when bred to mature cows and all progeny are fed and sold on carcass grade and yield basis.

Kentucky

All the bulls in the sale qualify for cost share money in Kentucky except lot 3 & 11

Most of the heifers in the sale will qualify for cost share money in KY. Check KY Dept. of Agriculture CAIP cost share program for details. and requirements at: http://www.kyagr.com/marketing/documents/AM_Beef_HB-Sale-Requirements.pdf

Tennessee

TN cost share information for 2026 was not available before catalog print date, information will be added to the supplement sheet prior to sale date.

Moderate frame, maximum weight. This bull is built wide, deep, and thick from end to end. Featuring a bold spring of rib, a wide top, and deep flanks, this bull packs immense volume into an efficient, easy-keeping design. He moves on a wide base, stands on exceptional bone, and brings the heavy-muscled look every commercial producer wants in the pasture. Thick, deep, and ready to go to work.

The breeding and bloodlines don't come any better than this. Grandson to the well-known SAF Black Don 857C ET this bull is something special. He's big footed, very muscle reflective, and built perfectly to slide right into any group of heifers. Don't let the low birth weight and calving ease fool you—he packs tremendous muscularity through his hindquarter and carries deep rib shape. He passed his BSE with flying colors and he moves with fluid athleticism through the field. If you want high-value calves on the ground from a bull that is docile this is the lot for you.

If you're a commercial breeder and are looking to cover a lot of cows with some power, growth, and quality, look no further. He is big, stout, and has the pedigree to back him up. His dam was sired by the ever-popular True North Angus bull and sired by our long-time favorite sire Iron Lake Regal. His EPDs are at the top of the breed as he ranks in the top 25 for yearling top 10% for weaning and marbling, top 4% of both API and TI and top 30% for CED.

An excellent choice for a Commercial breeder. This bull combines the power of one of our proven Angus females that carries an outstanding pedigree. Notice the length and smoothness of this bull that should pass on to his offspring with a very good growth package. He is also as docile as they come. Great marking with minimum white that should be represented in his offspring.

Due to color, we must sale him as a Commercial bull. His sire is none other than our long time clean up bull Iron Lake Regal. Be sure to notice the ranking on all his EPDs as they are at the top of the breed. He is very muscle reflective and travels easily. A sure-fire winner for any commercial herd.

*If you are looking for show quality look no further. This gentle beautiful red hided purebred ET heifer out of the historic Herford cow Sweet Red Wine 039 blood line won the Kansas City Royal as a heifer in 2024. Sweet Red Wine has left her mark throughout the Hereford breed for more than 20 years and now in the Black Hereford breed showing her maternal dominance.

*This first calf heifer sales with a purebred heifer calf HX038553 BCR M116 Sweet Wine M114 P182 by her side sired by BCR 018 The Bachelor K92 M116 who is a two-time Supreme Champion Bull out of Bar Star Fresh Prince x BCR G16 Genie in the Bottle K92 a 95% purebred donor cow.

*She is bred back to BCR 327 On Time K92 a Homo Black and Homo Polled champion bull in his own right and maternal half-brother to The Bachelor. This is a very exciting mating if you are in the market for a show prospect calf next spring for what should be a powerful black hided calf.

*Al'd to BCR On Time and then pasture exposed to BCR On Time from 6/2/26 - 7/26/26. Pregnancy update on sale day.

*This is very nice 3 in 1 combination with popular Hereford genetics that run deep in all three of these pedigrees.

This is a beautiful female in every way. She has tight udder and small teats, and her calves have been superior. One of her calves' sales as lot 90 and I think she is an elite open female with donor prospect written all over her. This female is long and has a lot of capacity and stems from one of our proven Angus females. We really question letting her go. Performance and proven females like these don't come around every day. She has 10 EPDs that ranks in the top 15% of the breed. You don't find many like this one She sells with a heifer by her side ready to wean. She sells safe in calf, AI'd to Griffin HB016495 on 6/16/2026.

We purchased this female as a yearling and her performance has not disappointed us. She has been outstanding She is a big frame cow with lots of volume and while still retaining good udder and teats. She is just now coming into her prime. She has a very good calving interval and a proven record in producing 5 offspring for us. She sells with a bull calf by her side and is safe in calf for a early fall calf sire will be announced on sale day.

This is an impressive looking young female that is doing a great job with her first calf. As she matures, she will be a deep body female with lots of spring of rib and depth. She has a promising future in front of her. She sells her calf with a heifer by her side and has been exposed to our homozygous herd bull HB032922 Pregnancy and calving date will be announced on sale day.

We love this female. She is so docile but more importantly is her performance as she has produced 6 extremely good calves for us without missing a beat. Her fertility and, maternal traits are superior and she has many years left in a program for the new owner. We hate to let her go but we have many young heifers for replacement and must move some of these mid age cows. She sells with a 9/25 B/W heifer calf by her side by 30G Griffin HB016495.

Consigned by: Triple T Farm We purchased this female at this sale last year from Acorn Ridge. They really do a good job with their breeding, and it shows in this fancy heifer. We should probably keep her, but we have many of our own breeding coming on. This female is thick and a pedigree that will match any. She sells safe in calf for a early spring calf to our homozygous Herd bull HB032922 and should calf before the sale. Calf will be black and have a 50% chance of being homozygous black.

Short marked and black to the ground with just a touch of white on her belly. Deep, big ribbed heifer out of one of Corey Sims best cows (Sims Ga. Peach F059) I was able to purchase a couple years ago. Her sire is JCR's Double Trust Cat 107 ET "Bugsy". Peyton was a twin to Lot 83. She'll make a front pasture cow in any herd. I really hate to give her up. DNA Submitted and will be available by sell day.

Any doubt as to who her sire is just look at the marking on her face. Another deep, big ribbed heifer out of one of Corey Sims best cows (Sims Ga. Peach F059) I was able to purchase a couple years ago. Her sire is JCR's Double Trust Cat 107 ET "Bugsy". Crystal was a twin to Lot 82 that ended up being raised on a nurse cow. She's a little bigger than her sister but just as good. This is a nice heifer! Don't let her being hetrozygous black and hetrozygous polled stop you from bidding.

If you're searching for the kind that can elevate an entire breeding program, look here. This elite female blends a powerful pedigree with breed-leading performance, combining the influence of F5 ILR Regal 513C and the outstanding Triple T's 20K Kamora by ILR cow family. She posts an exceptional EPD profile featuring CE 20.0, BW -1.6, WW 68, YW 109, Milk 32, and TM 66, making her a rare combination of calving ease, growth, maternal strength, and long-term profitability. Females with this much genetic and breeding versatility seldom leave the donor pen. A true herd-builder with the credentials to headline any sale and the potential to impact the Black Hereford breed for generations. She sells open. We are selling full position but retaining 1/2 interest in ownership.

Consigned by: Triple T Farm

Autumn represents the kind of maternal female that never goes out of style. Sired by C TRIPLE YOUR MILES. She combines pedigree strength, structural integrity, and balanced performance. With an attractive combination of calving ease, maternal value, and longevity, this young female is the type to build a program around and produce the kind of daughters you'll want to keep. A true replacement-quality female with the genetics and look to make a lasting impact. She sells open.

COMMERCIAL SPRING BRED HEIFERS

93

Consigned by: Triple T Farm

TRIPLE T'S 84N

An eye-catching heifer that has a lot of power and capacity. Her red Hereford dam and performance Angus sire make her an elite female. She sells safe in calf for a late spring calf to our homozygous Black Hereford bull. Calf will be black/white.

94

Consigned by: Triple T Farm

TRIPLE T'S 93M

She is a Commerical cattlemen's dream as she is built for the pasture and production. Her dam is a standout Red Hereford, and her sire is a performance data Angus. She sells safe in calf to our homozygous Black Hereford bull for a late spring calf. Calf will be B/W.

95

Consigned by: Triple T Farm

TRIPLE T'S 95M

A top-notch female stemming from a high-quality Red Hereford cow and a performance driven Angus bull. You won't find a much better-quality B/W heifer. She sells safe in calf for a late spring calf. Pregnancy and calving date will be announced on sale day.

96

Consigned by: Triple T Farm

TRIPLE T'S 17N

This females dam is a registered Angus out of the famous Emblazon 999 bull. We accidentally turned the dam in with our Black Hereford bull. She's not Registered but carries an extraordinary pedigree for a Commerical cow. Commerical cattle of this type of pedigree and breeding are rare. You don't want to let her slip away. She sells AI safe in calf for a March calf to 12 HD HB019398 . Calf will be black and white.

COMMERCIAL OPEN HEIFERS

Consigned by: Triple T Farm

These four females will pack a punch in any Commerical herd. Their dams are Angus and their sire is a Black Hereford. These are the kind that are bred to put calves on the ground that will grow and have eye appeal. More importantly they will put money in your pocket. They sell open and ready to breed.
